

Change in the position of Help and Logout with profile icon

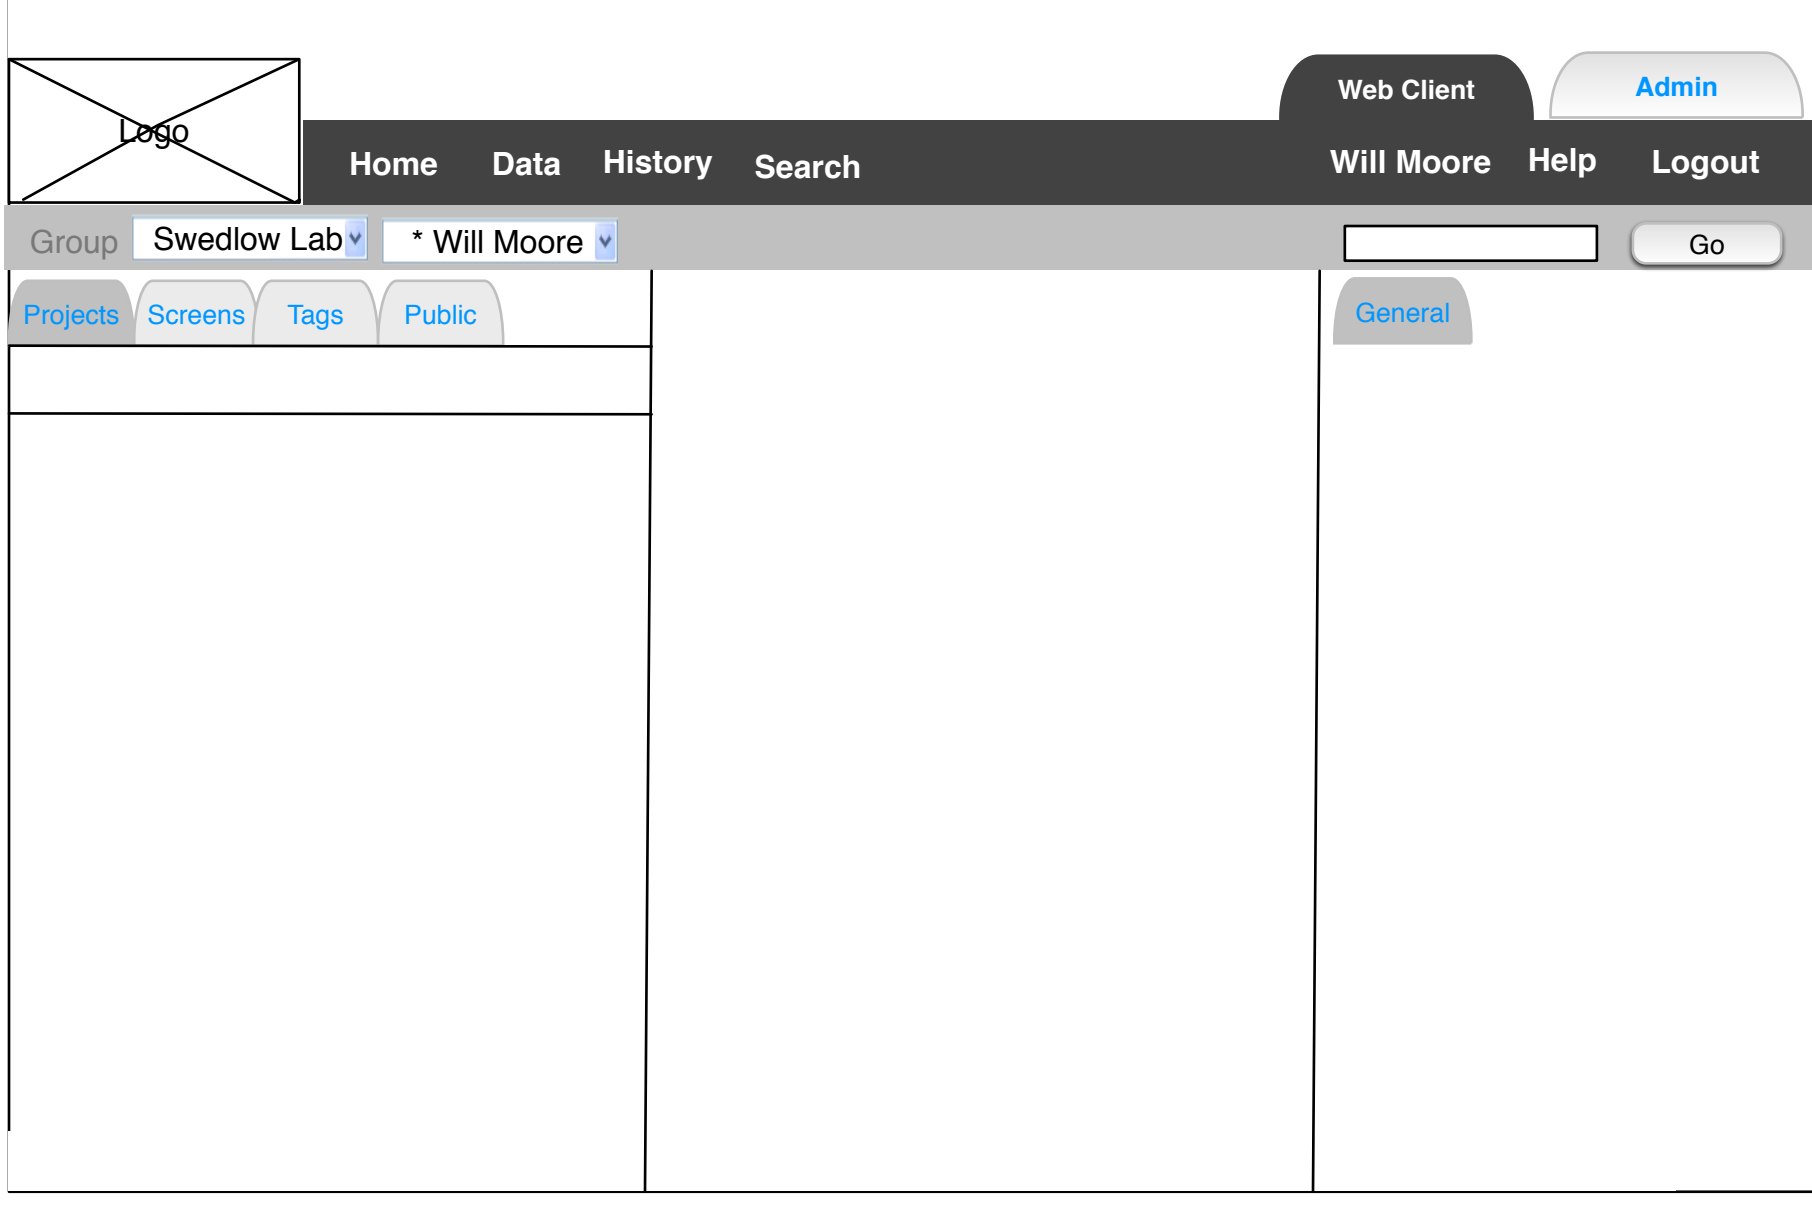

Original screenshot copied - dated 22nd Dec

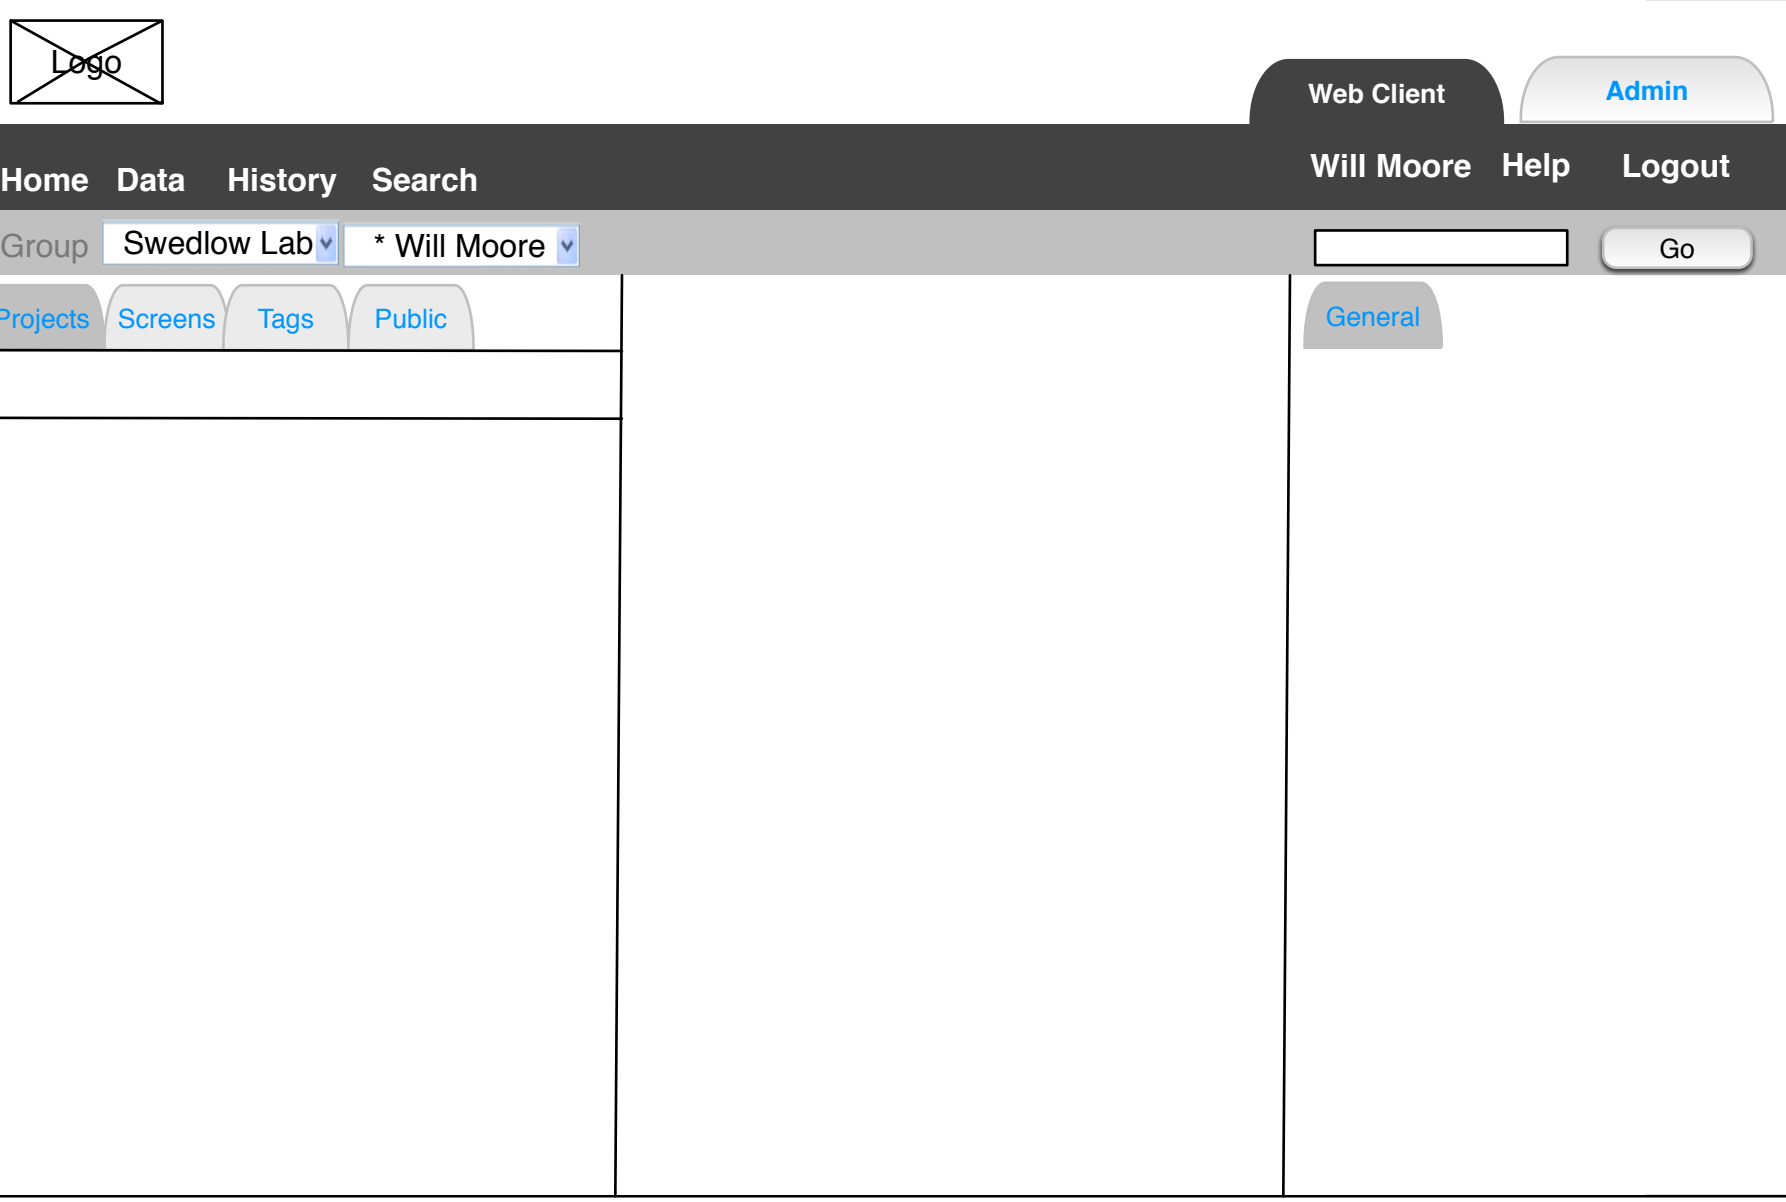

I am not sure this text should be red?

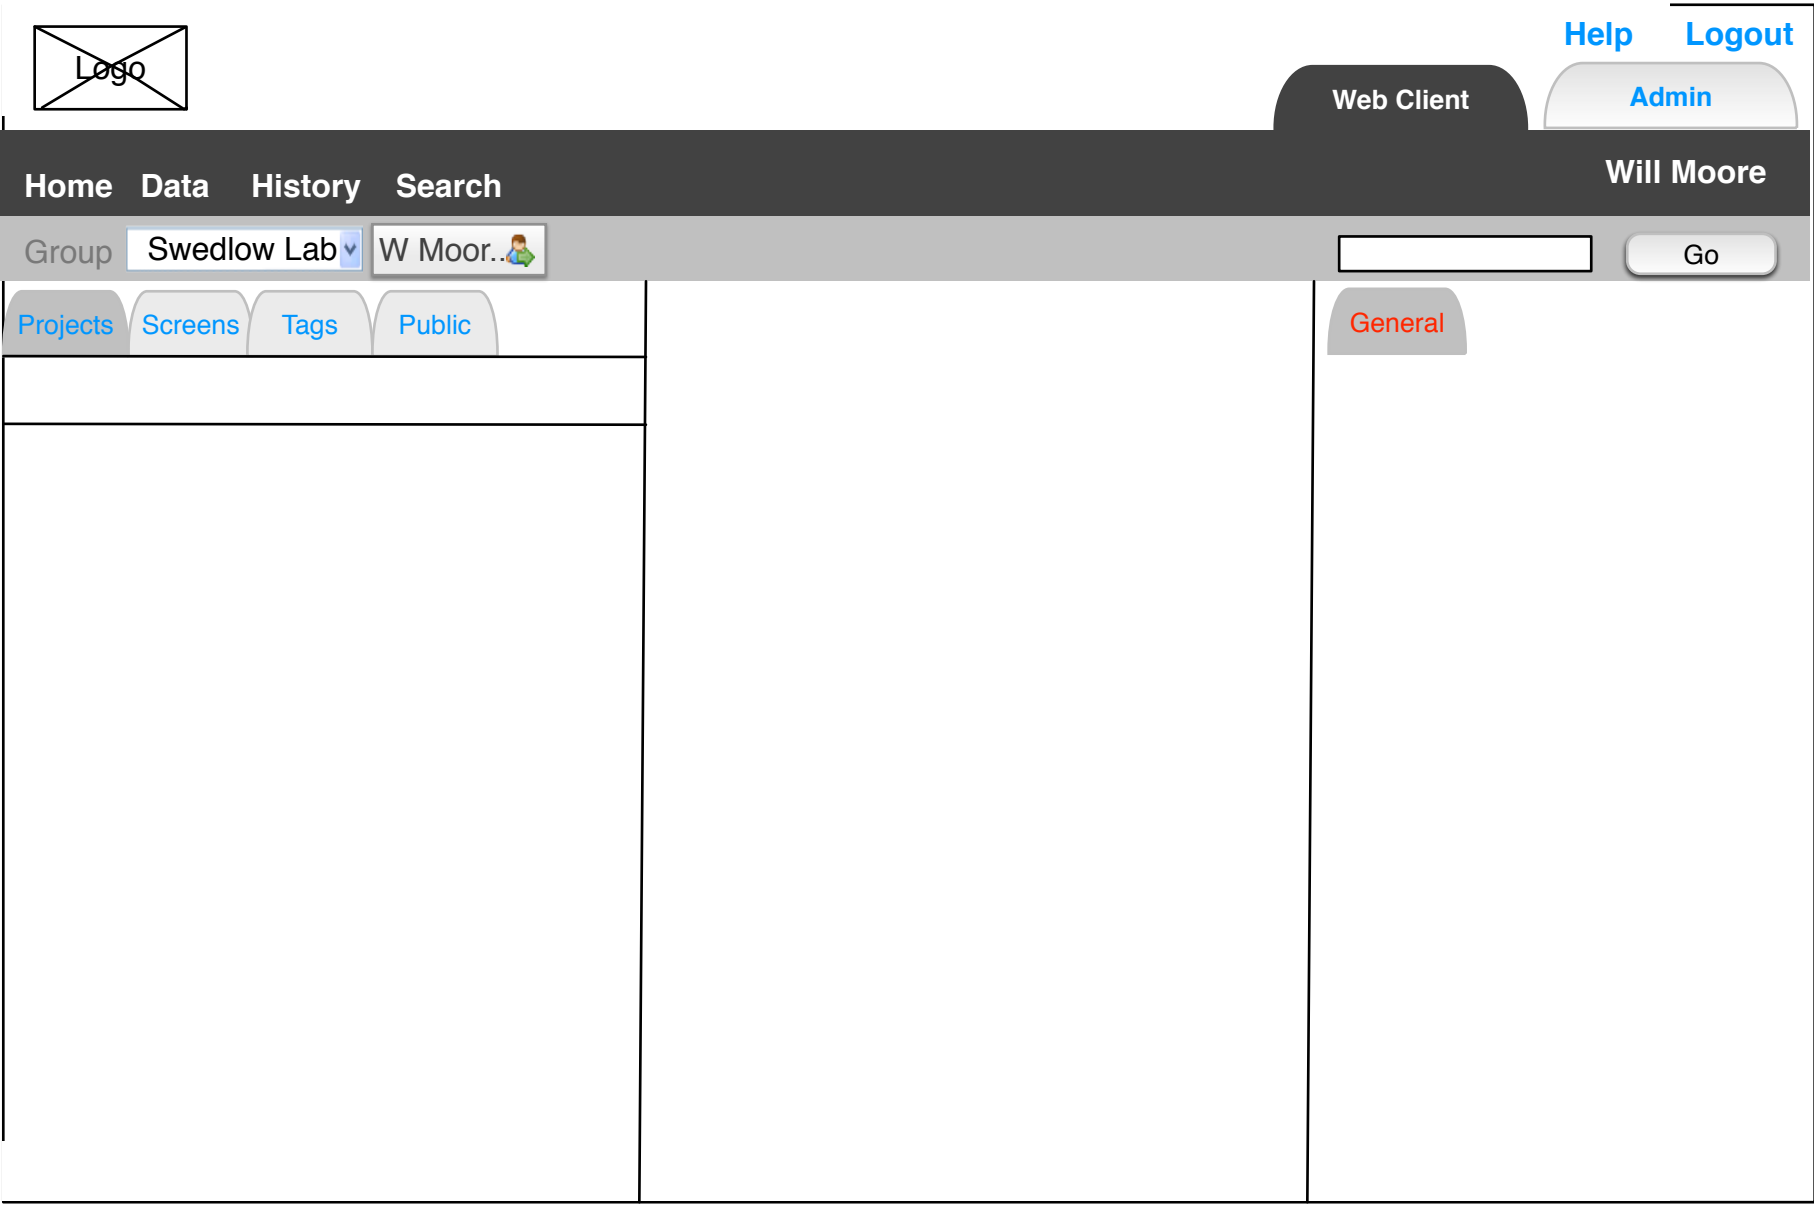

Change in position for logo - this could be problematic as takes up a larger portion of top left hand space

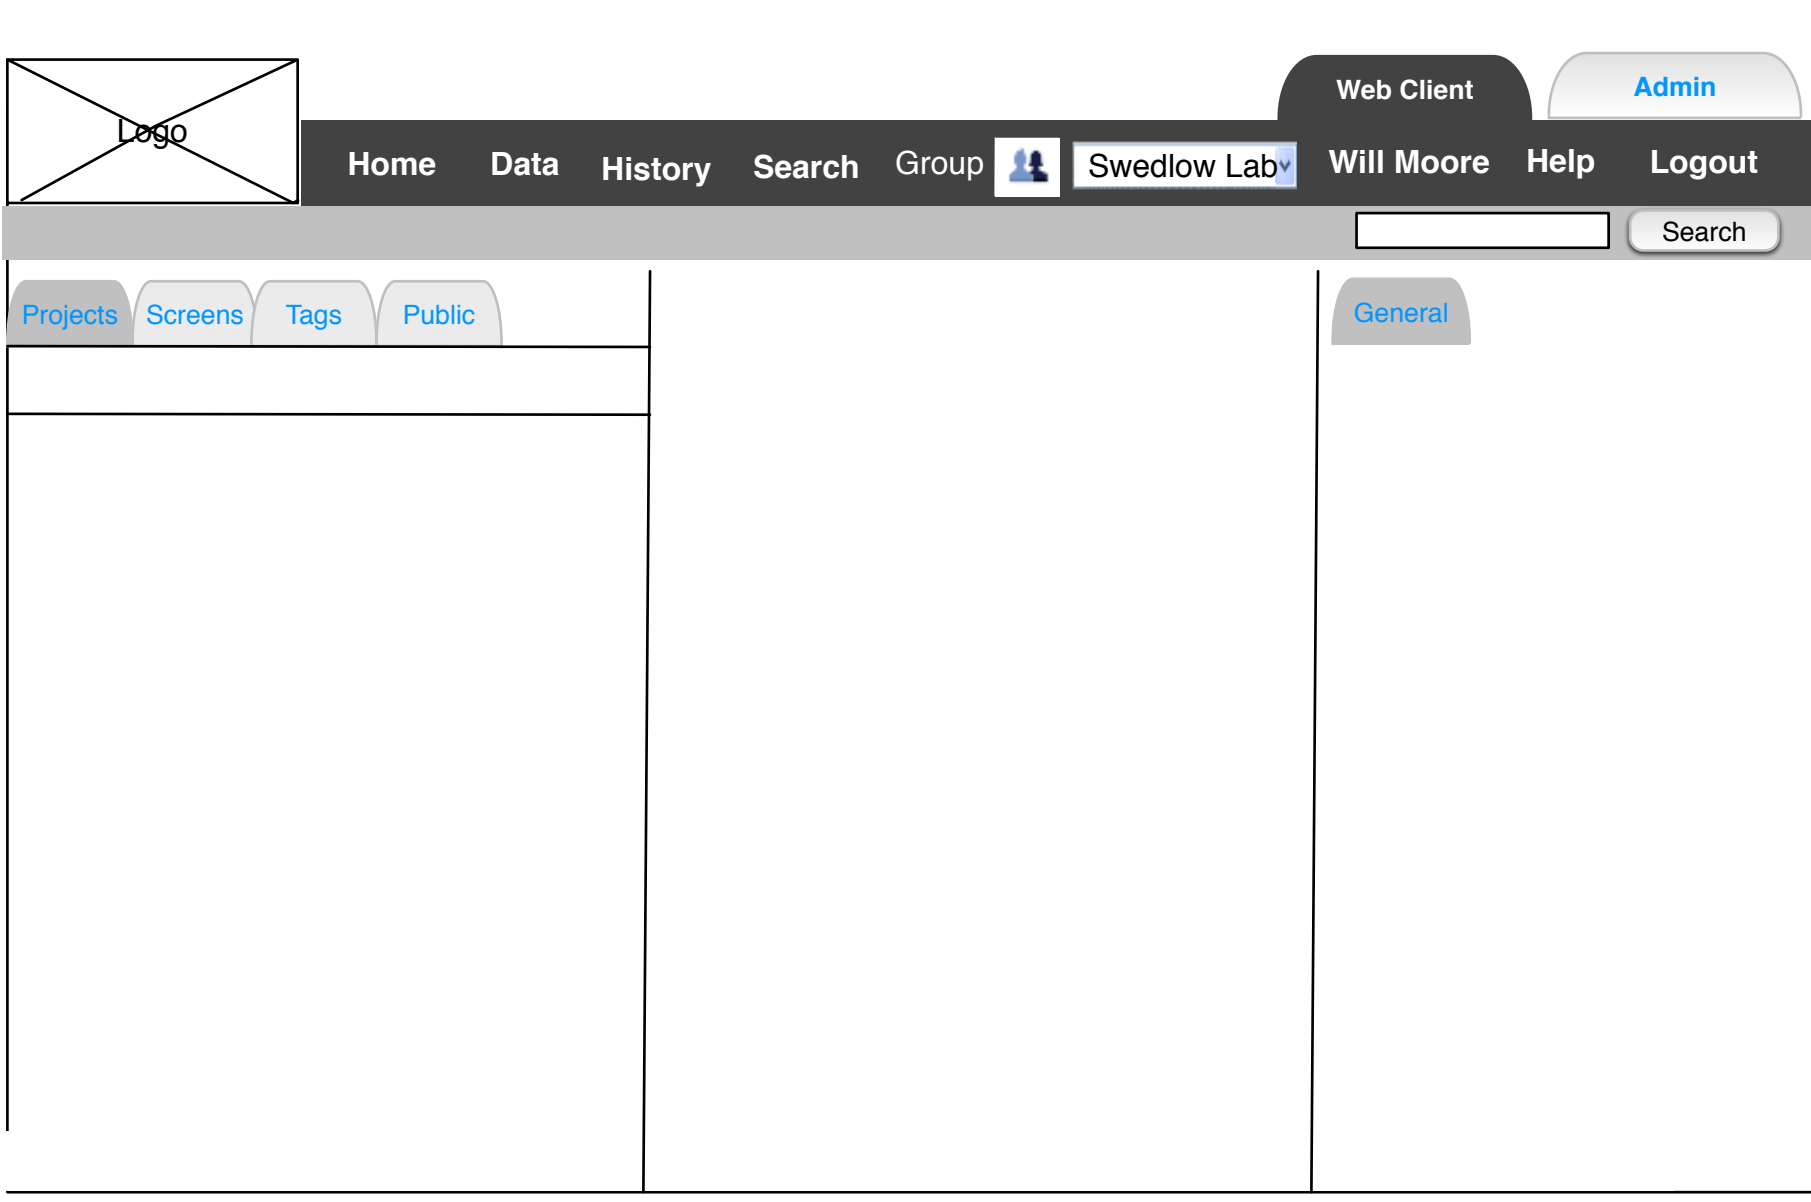

Change in the position of Help and Logout

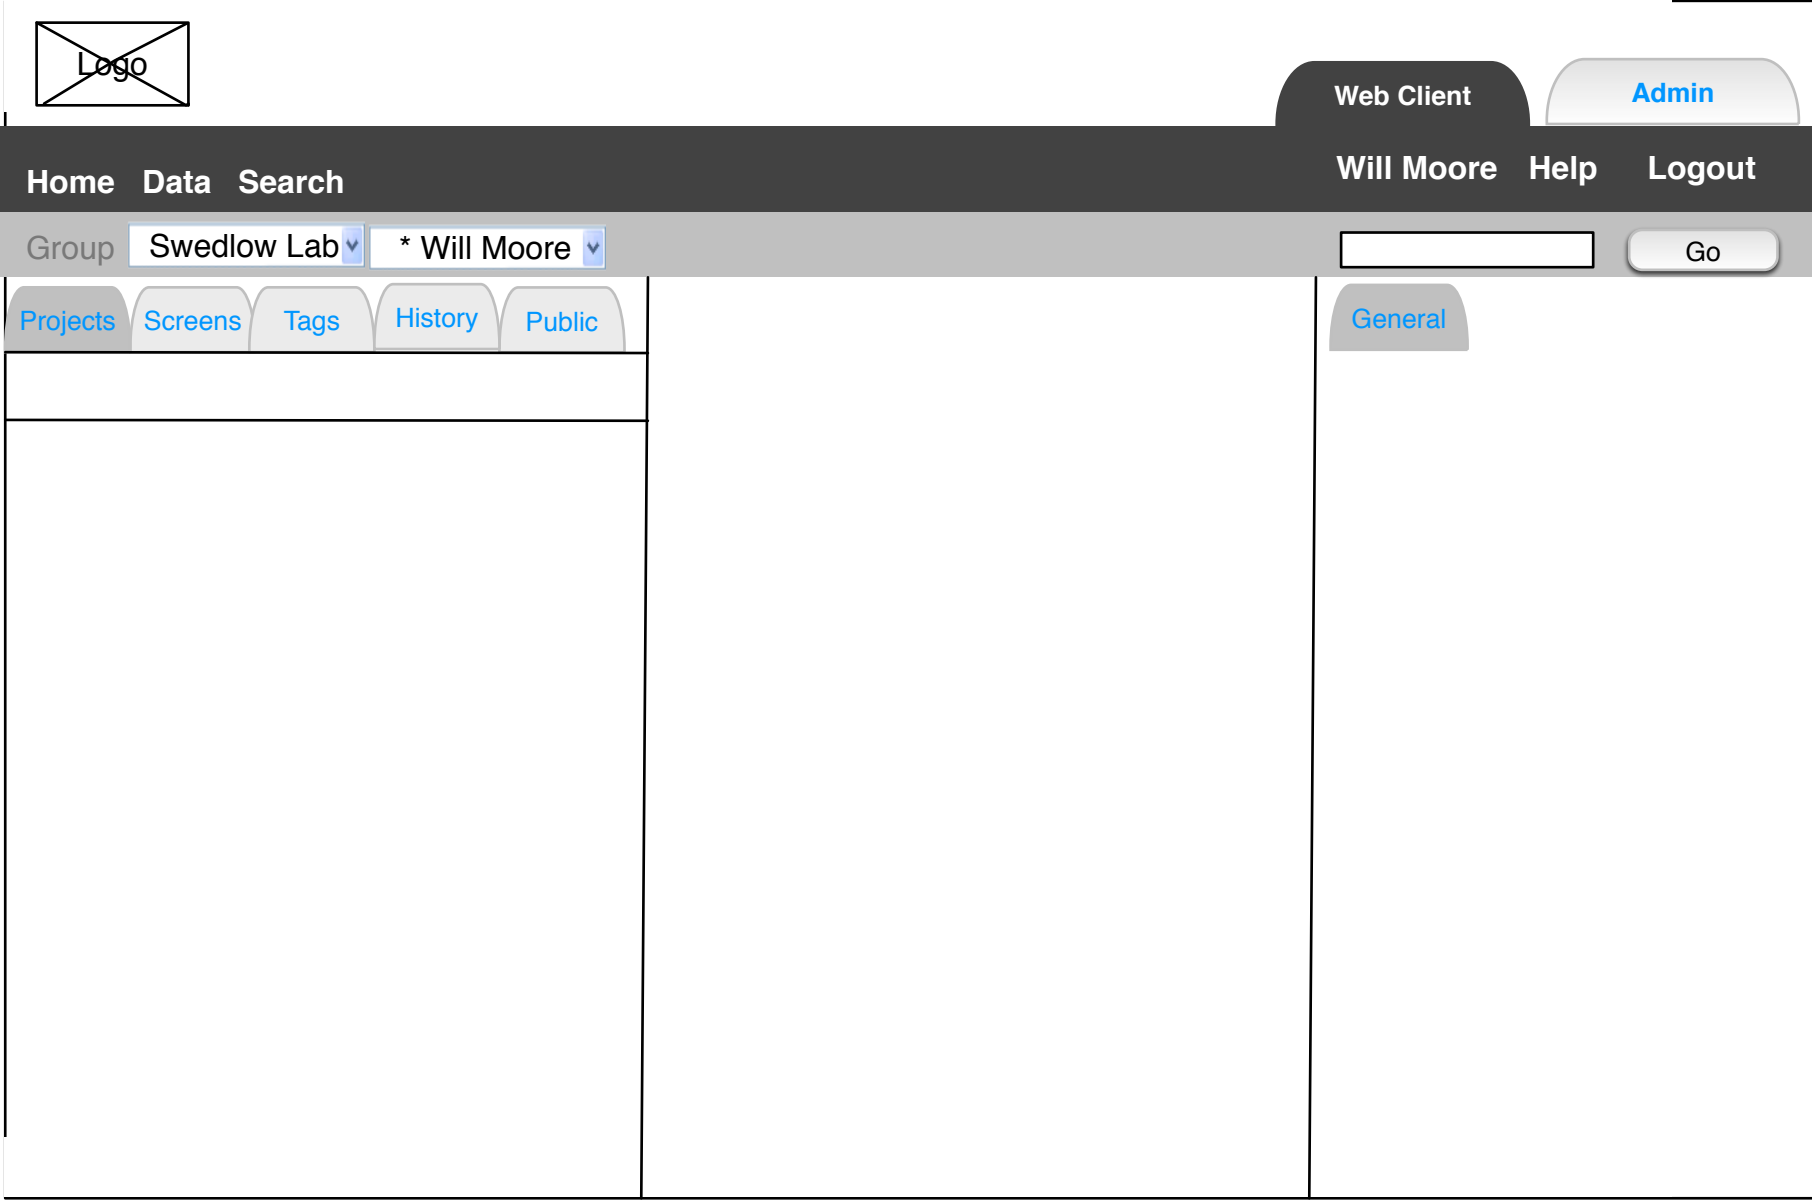

Button Alternative for user selection

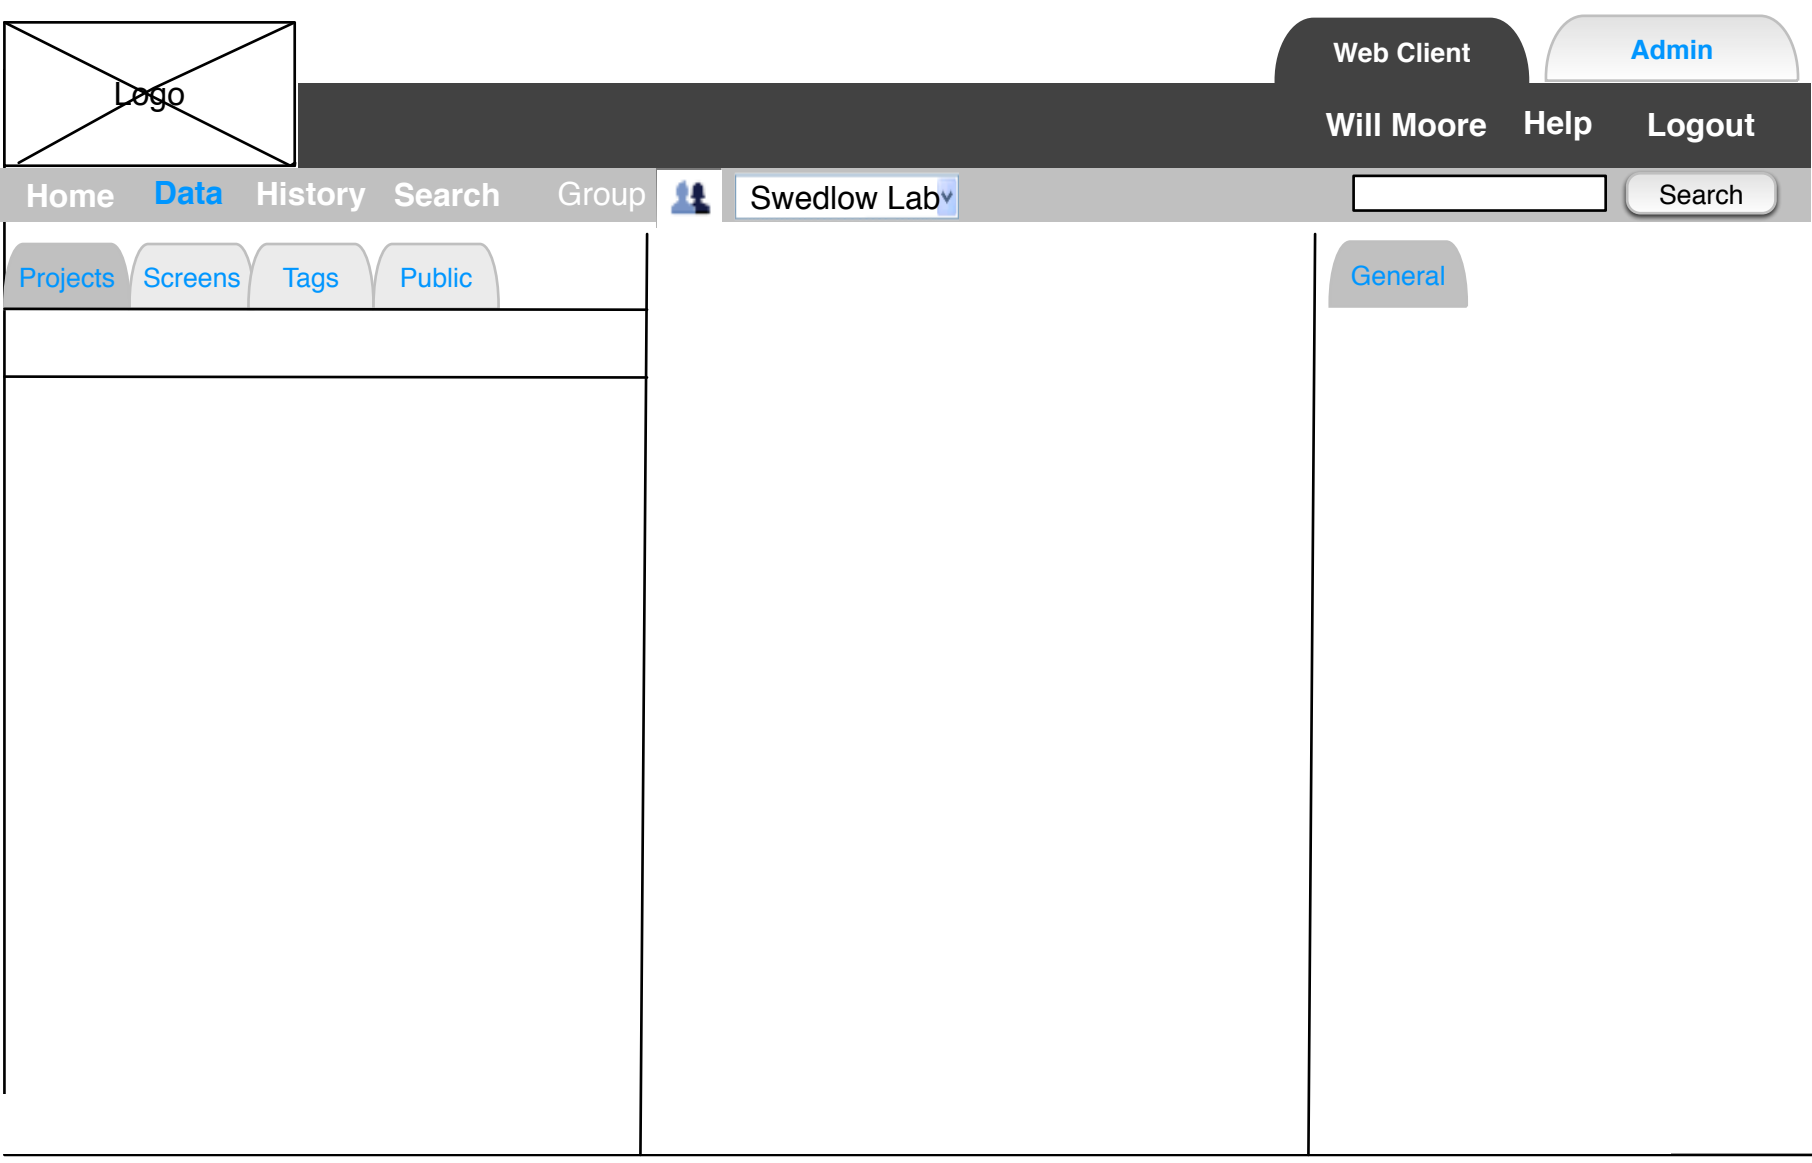

Change in position for logo + regrouping of second level information - this could be very problematic as the top level looks very overcrowded

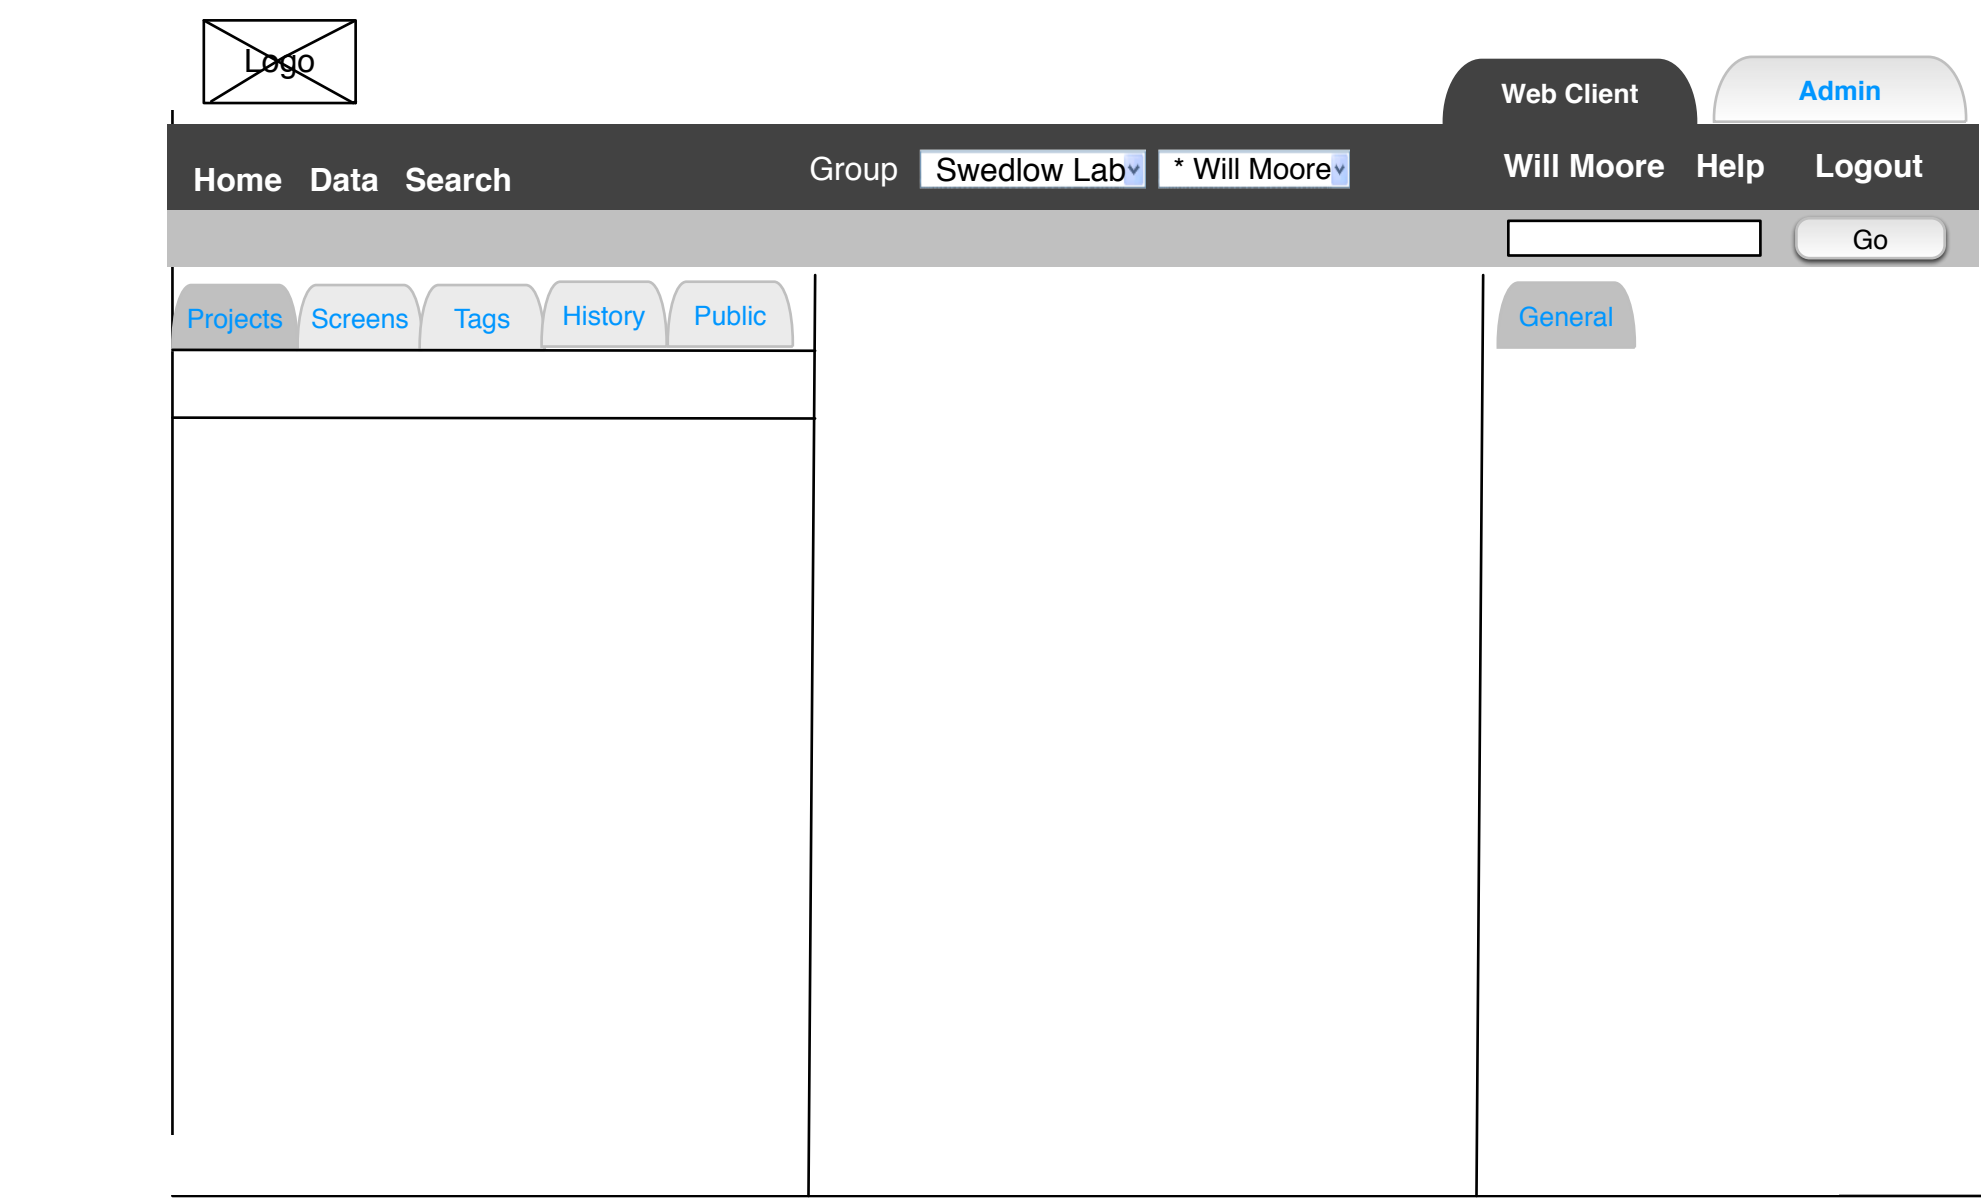

Change in the position of Help and Logout + change in position of History

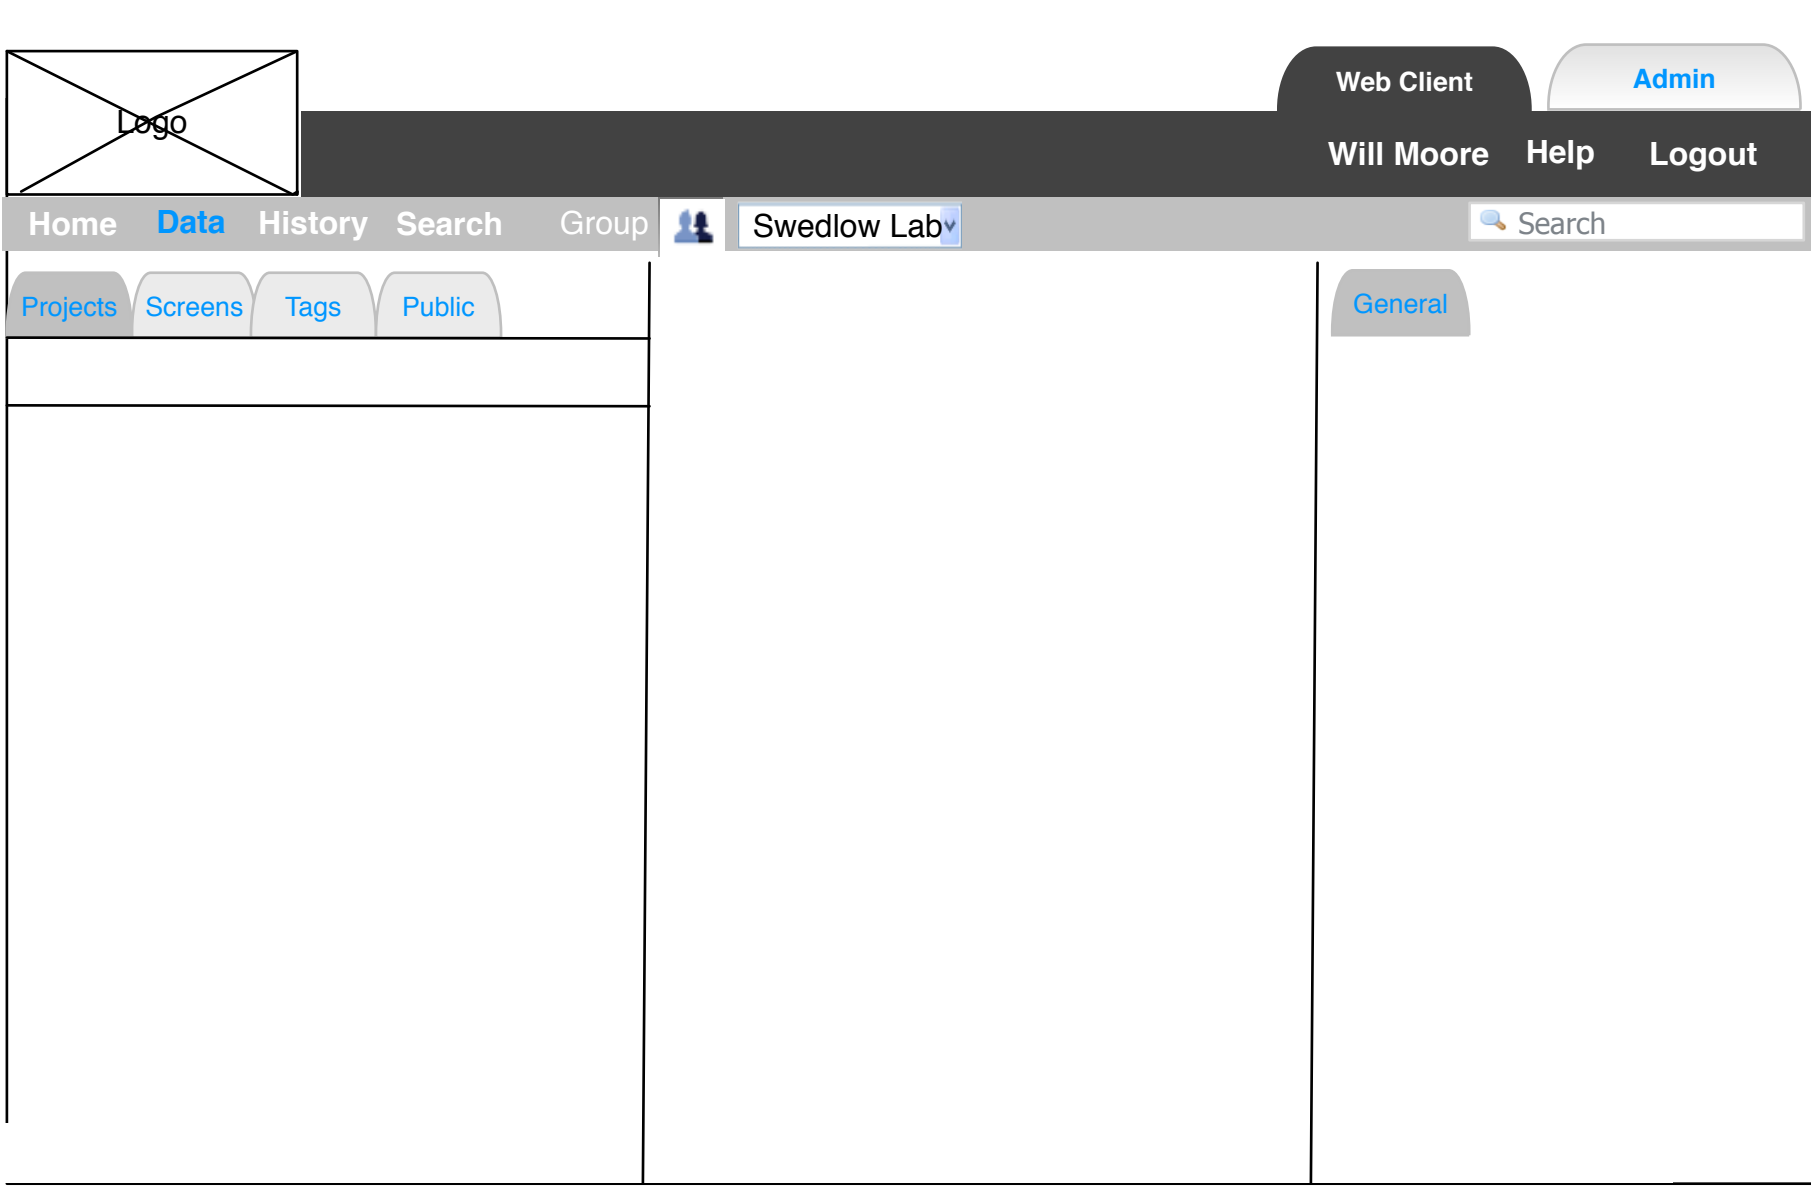

Change in position for logo + regrouping of second level information

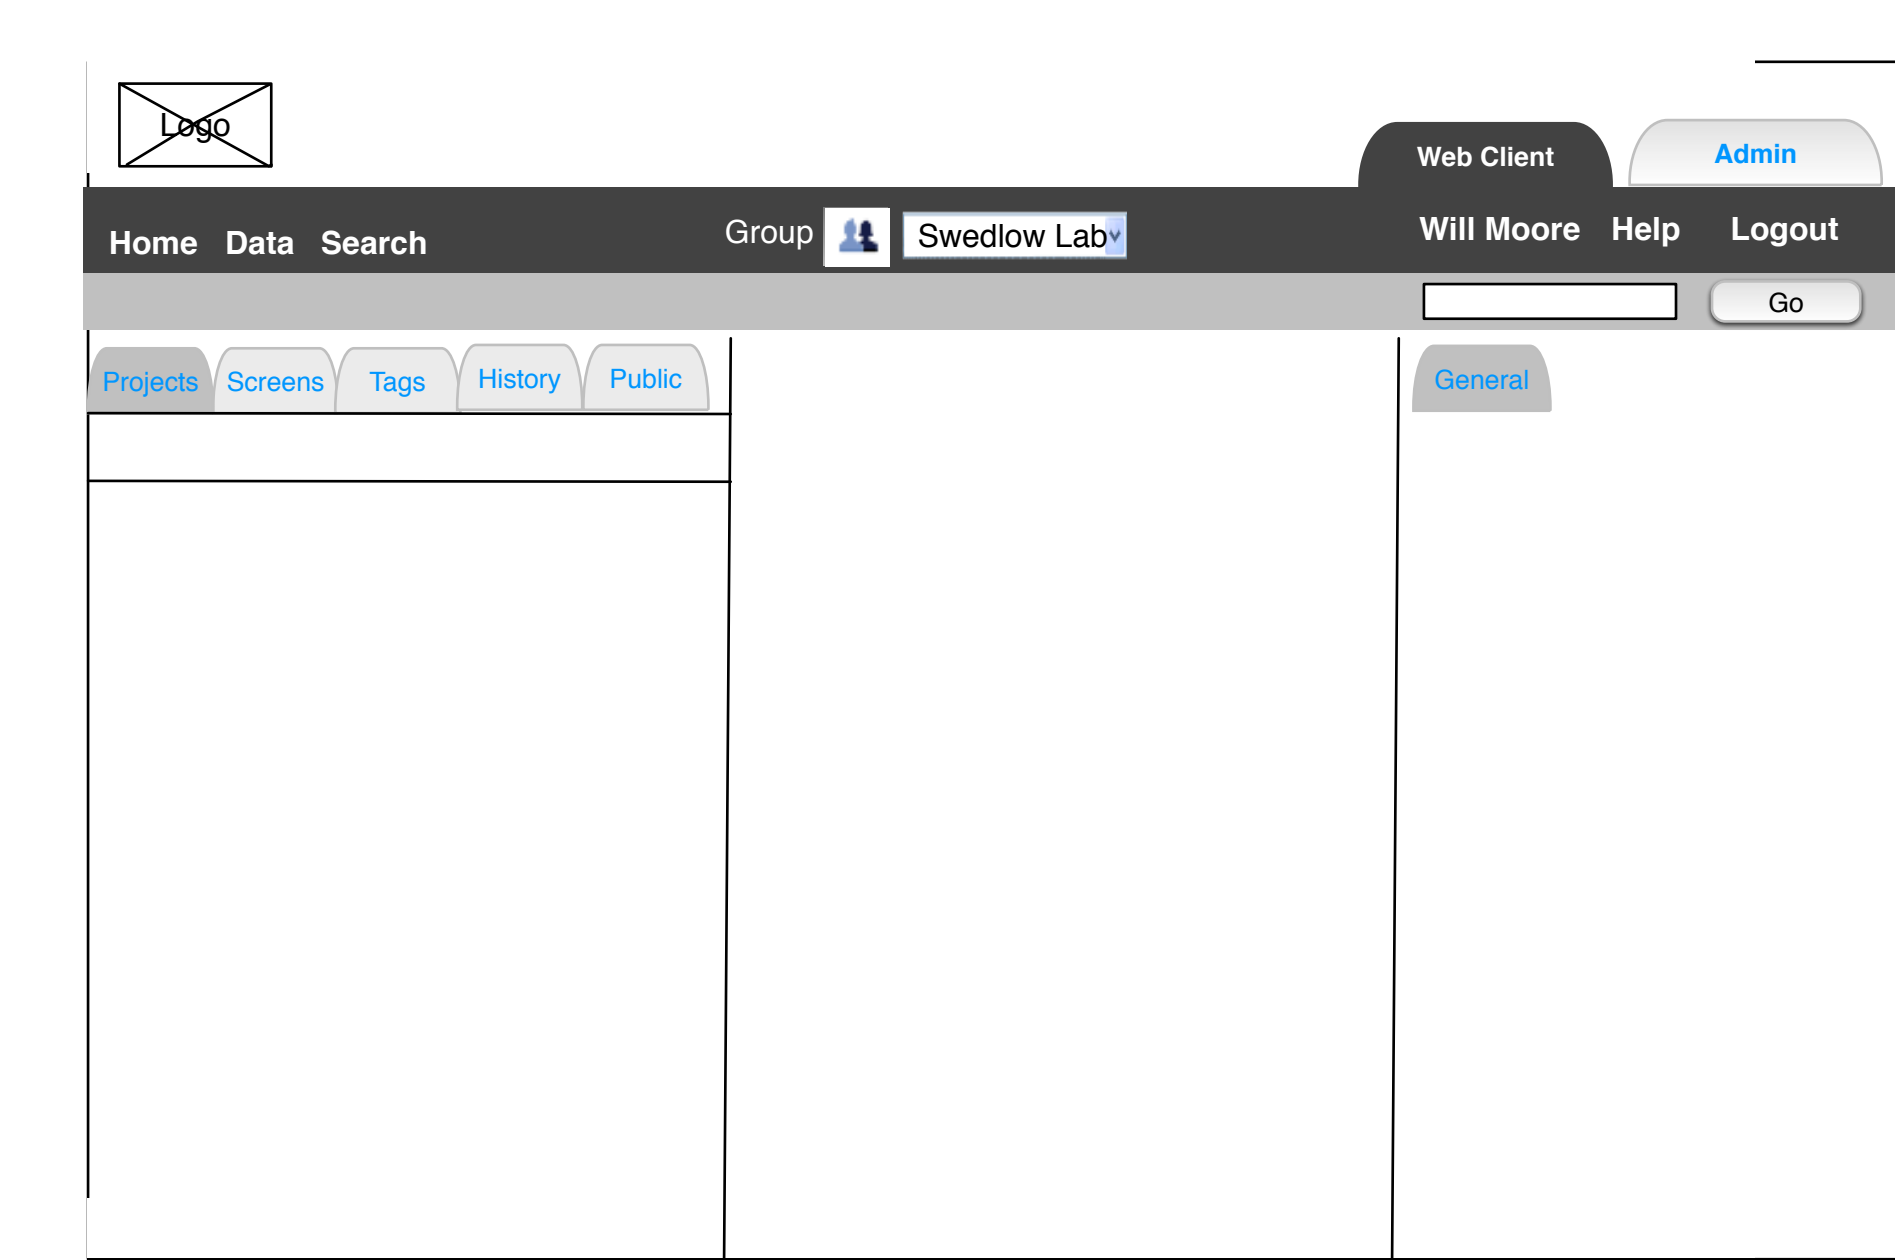

Change in the position of Help and Logout + change in position of History + position of group dropdown box

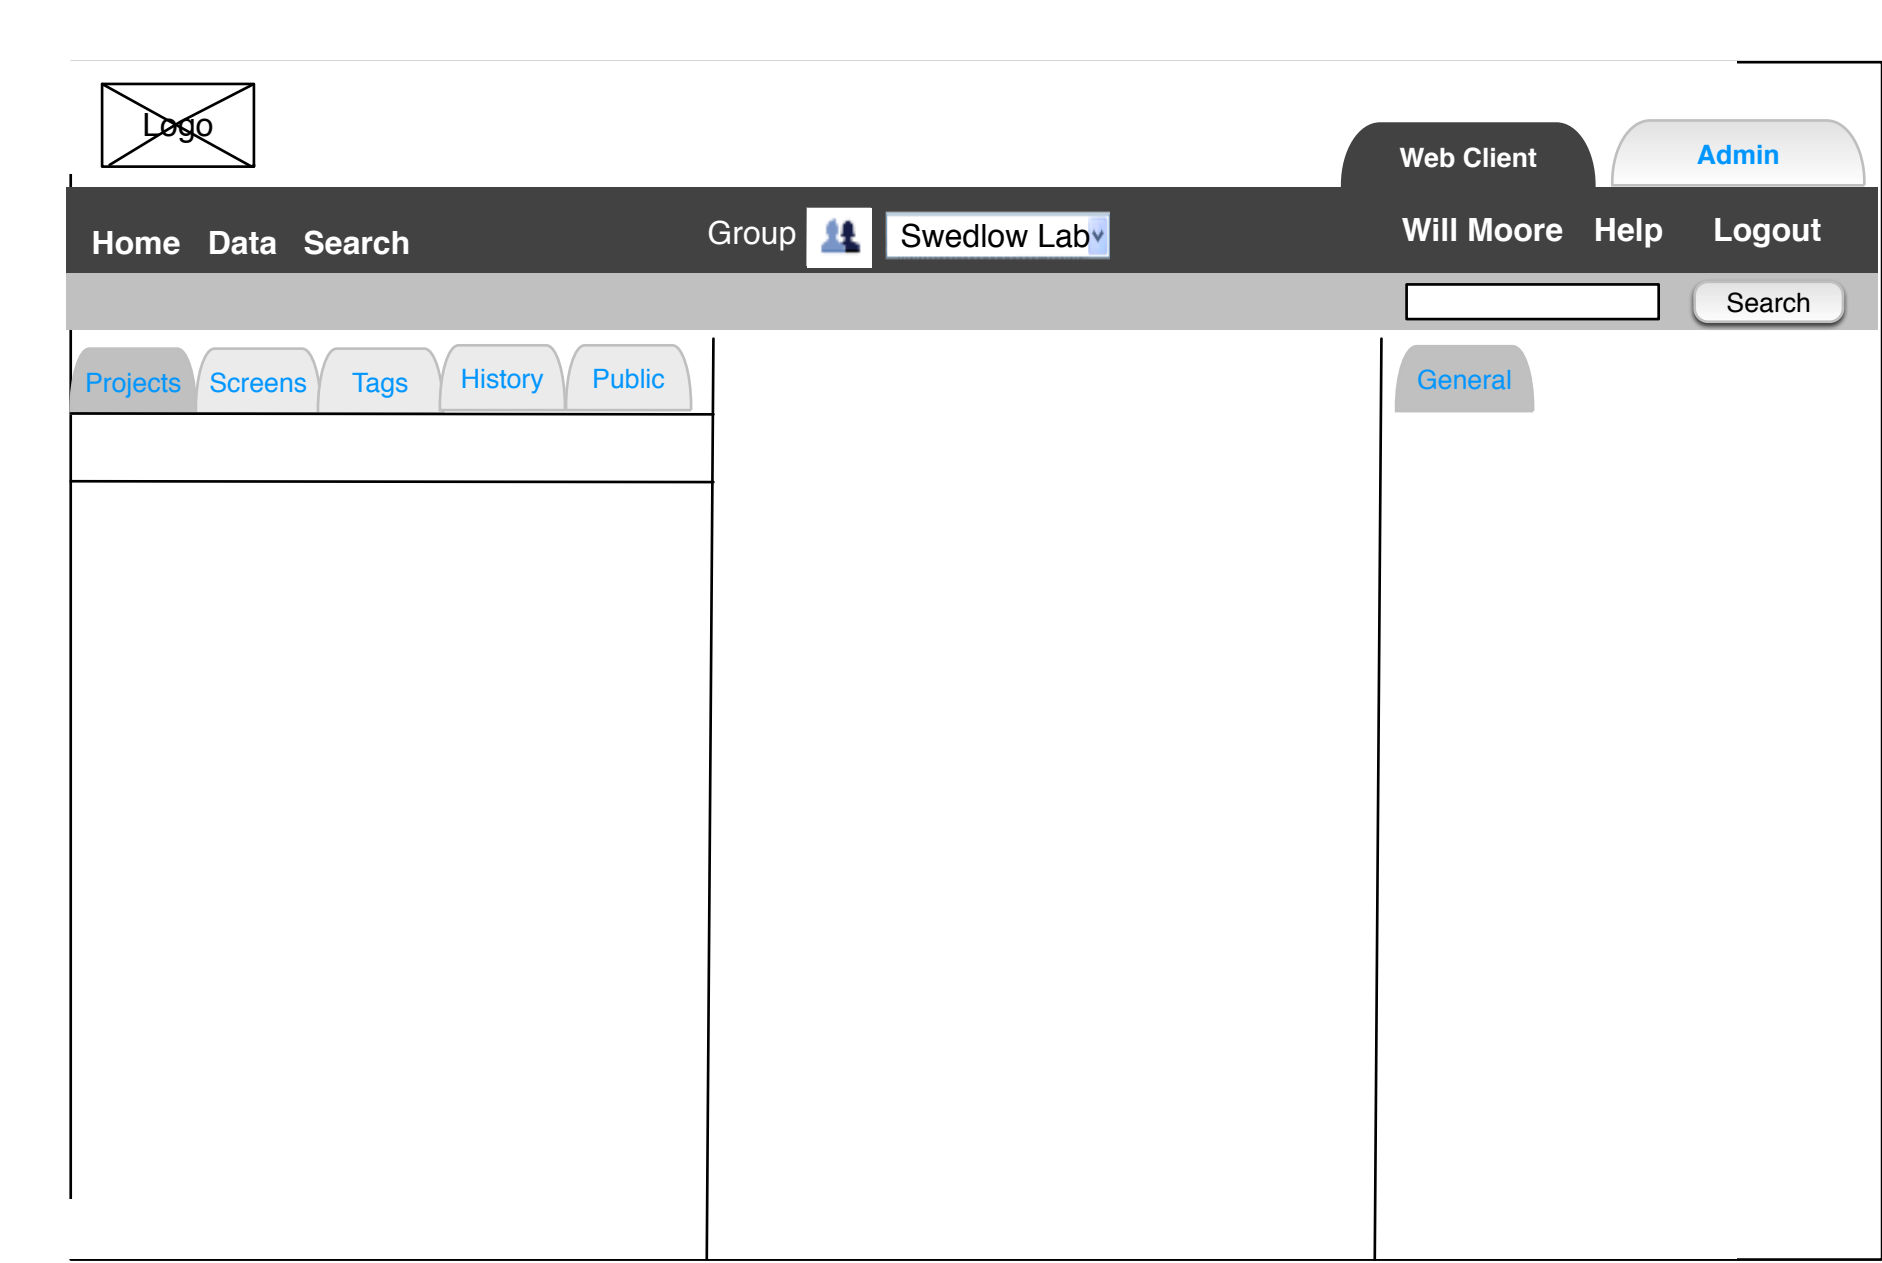

Change in position for logo + regrouping of second level information + search

Change in the position of Help and Logout + change in position of History + position of group dropdown box

Change in the position of Help and Logout + change in position of History + position of group dropdown box

Change in the position of Help and Logout + change in position of History + position of group dropdown box
