**Bug: CSS in IE9**

Activity drop down - plain bright blue header BG makes it very difficult to see title and button - in fact I though they were missing and only saw them on zoomed screenshot. (Whereas in Mac Safari stand out well against grey BG.
See screenshots below.

Getting same dark blue BG as selection highlight for active items in drop downs such as scripts and users-groups - see screenshot below. Not so bad as text is light, but still out of keeping with overall colour scheme compared with Mac version (screenshot below).
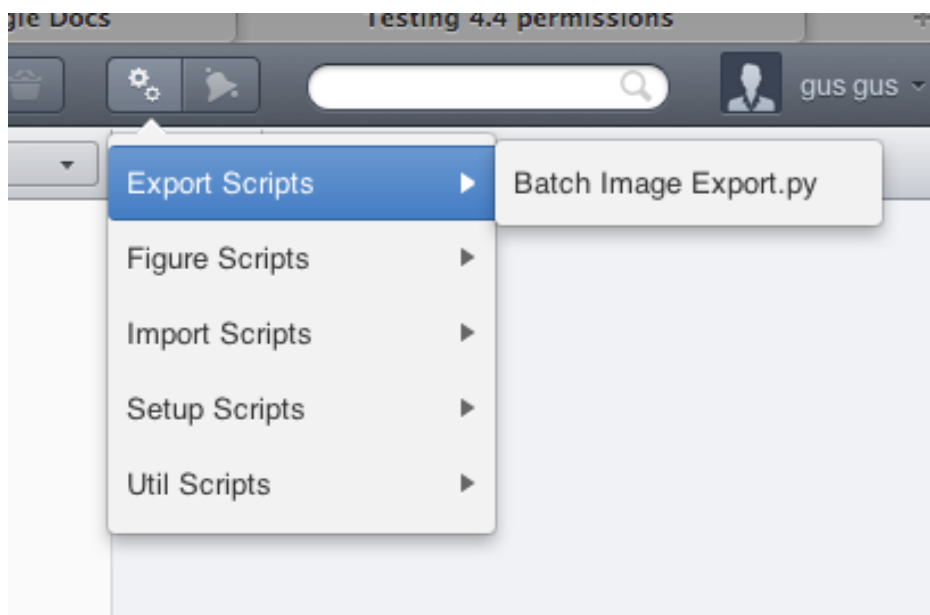

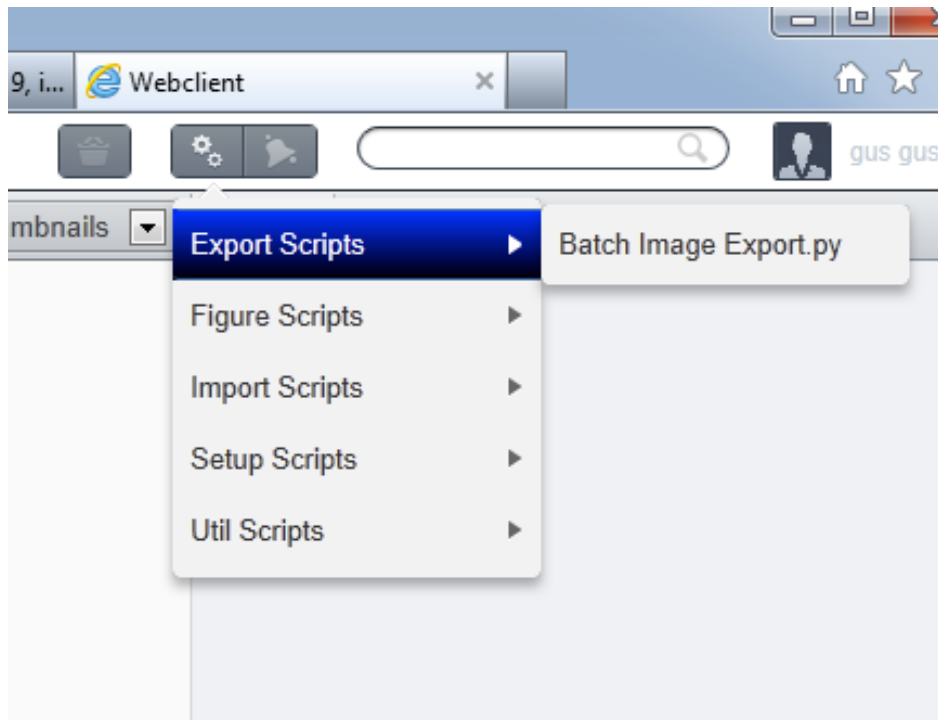

? all some CSS anomaly.

Win 7 IE 9

Mac Safari

Noticed on logging out and back in again that the login button has now gone dark blue as well.
